LDPE STRETCH FILM

- A Stretch film holds boxes and products together on a pallet for transportation. It is also used to hold other objects together and protect objects during transport and storage.

USED IN :

- Elevators
- Pharmaceutical
- Industries
- Packers and movers
- Food service
- Metal industries
- Bagged products

SURFACE PROTECTION FILM

- Non-transferable Adhesive under different climatic conditions.
- Excellent protection against abrasion and scratches.
- Weather resistance.

USED IN :

- Anodising and Powder Coating plant
- Elevators Industries exterior glass
- Marble Industries
- Stainless steel Industries
- Fibre doors

SPACER TAPE

- **Spacer tapes** are used to maintain the defined distance between glass pane and metal frame prior to applying the structural silicone. Structural glazing is a modern facade manufacturing technique that opens new perspectives in glass architecture.

USED IN :

- Aluminium fabricators
- Facade system

FOAM TAPE

- **Foam tapes** are used for sound dampening, insulating, gasketing, cushioning/padding, and sealing and are designed to enhance the appearance and improve the overall performance of your product design.

USED IN :

- Aluminium fabricators
- Facade system
- For Industrial Use

MASKING TAPE

- **Masking tape**, also known as painter's tape, is a type of pressure-sensitive tape made of a thin and easy-to-tear paper, and an easily released pressure-sensitive adhesive. It is available in a variety of widths. It is used mainly in painting, to mask off areas that should not be painted.

USED IN :

- Aluminium fabricators
- Furniture supplier
- Paint Industries

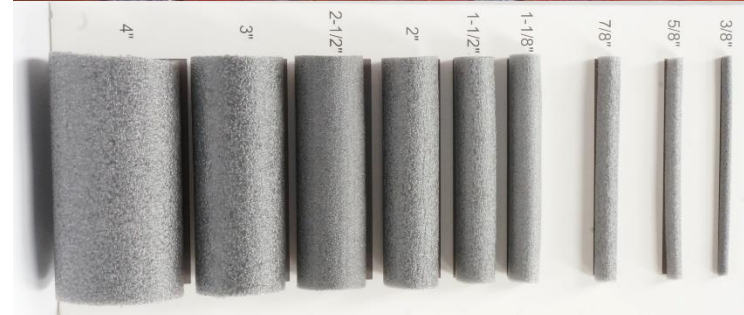

BACKER ROD

- A **backer rod** is a cylindrical type of foam used to fill cracks and gaps between building materials. It is used in a wide range of applications including tiling, flooring, window paneling and stoneware among others.

USED IN :

- Aluminium fabricators
- Facade Industry

FLOOR MARKING TAPE

- **Floor Marking Tape** is high strength, single coated pvc film base tape with strong rubber based adhesive. It offers immediate quick stock yet allows for removal with minimal residue

USED IN :

- Industries and Manufacture's

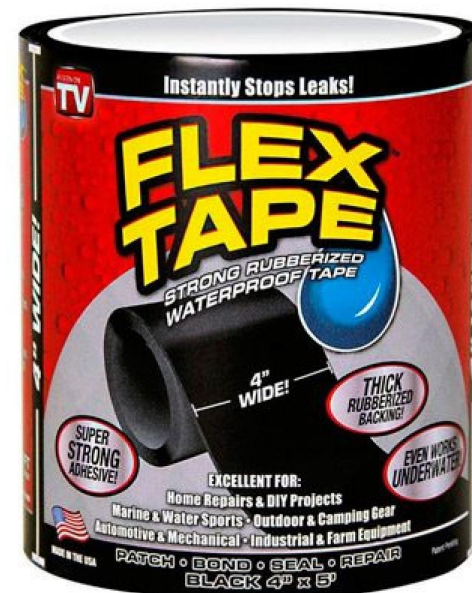

FLEX TAPE

- **FLEX TAPE** is a super strong, rubberized, waterproof tape that can patch, bond, seal and repair virtually everything. FLEX TAPE is specially formulated with a thick, flexible, rubberized backing that conforms to any shape or object. FLEX TAPE can be applied hot or cold, wet or dry, even underwater.

USED IN :

- Plastic industries
- Water leakage service provider

**FLEX
TAPE**

Patch

Repair

Bond

Seal

TONER CARTRIDGE

- A **toner cartridge**, also called laser toner, is the consumable component of a laser printer.
- Toner cartridges contain toner powder, a fine, dry mixture of plastic particles, carbon, and black or other coloring agents that make the actual image on the paper.

USB KEYBOARD

- A **USB keyboard** connects to your computer via a cable that goes into your computer's USB port. USB keyboards are plain and simple plug-and-play devices and they are extremely reliable

USB MOUSE

- Today, for a desktop computer the most common type of mouse is an optical mouse that connects to the USB port and known as a USB mouse.

WIRELESS MOUSE

- A wireless mouse can free up space around your computer and is an option to using a computer's directional pad. Wireless mice function in a similar manner as wired mice, but operate without a cord.

BARCODE SCANNER

- A **barcode reader** (or **barcode scanner**) is an optical scanner that can read printed barcodes, decode the data contained in the barcode and send the data to a computer. Like a flatbed scanner, it consists of a light source, a lens and a light sensor translating for optical impulses into electrical signals.

BARCODE LABEL

- A **barcode** is a method of representing data in a visual, machine-readable form. Initially, barcodes represented data by varying the widths and spacings of parallel lines.

BARCODE RIBBON

- Thermal Transfer **Barcode Ribbons** are used to print various types of barcode labels.

TTO RIBBON

- Thermal Transfer Overprinters (**TTO**) or Thermal Transfer Overprinting (**TTO**) is a technology that creates images in high-definition by pushing a ribbon into contact with a substrate using a printhead.

VHB TAPE

VHB Tapes are a family of double-sided foam tapes made from high performance acrylic adhesives. These tapes are able to form bonds of exceptional strength and have greater durability and elasticity than conventional double-sided foam tapes.
